

RAFI IKHSANUL HAKIM

Fullstack Web Developer | AI Application Developer

Bandung, Indonesia | +62 896-5478-2430 | rafihakim383@gmail.com | linkedin.com/in/rafi-ikhsanul-hakim | github.com/RafiAkem | rafiakem.tech

SUMMARY

Informatics Engineering graduate from Universitas Pasundan (2026, GPA 3.66/4.00) who builds, ships, and operates web products end to end, from scratch to production. Four products are running with real users: a paid API gateway with 76 registered users and 28 completed payments, an AI microlearning platform with a registered copyright, a RAG-based SaaS platform, and a personal portfolio site. Strong in JavaScript/TypeScript (React, Next.js), Node.js and PHP (Laravel) backends, PostgreSQL/MySQL, REST API design, and deployment to Linux servers with Docker, Nginx, and CI/CD. Interned at PT Telkom Indonesia on an enterprise application re-engineering project, rebuilding a running system without access to its legacy codebase.

WORK EXPERIENCE

Software Engineer Intern - IT Division | PT Telkom Indonesia (Persero) Tbk, Bandung | July 2025 - September 2025

- Contributed to ReEngine, the re-engineering of the TGCast application (an internal enterprise email broadcasting system) from CodeIgniter 3 to a modern stack: Laravel 12, Inertia.js (React 19 + TypeScript), and MySQL
- Rebuilt the product solely from the running system's observable behavior, without access to the legacy codebase, starting by reading and understanding the existing system's flows
- Implemented dual authentication and S3-compatible storage integration
- Built background job queues with batching for asynchronous processing
- Debugged and troubleshooted issues in development and staging environments, running per-feature functional testing before handover
- Optimized CI/CD pipelines (GitLab CI), deployed to OpenShift (OKD), and followed enterprise Git flow and code review within an agile team

Freelance Fullstack Web Developer | Clients: EasyLzin, startups, and small businesses (remote) | October 2024 - Present

- Delivered client projects from requirements gathering with founders through to deployment: public Next.js + Tailwind CSS sites and Laravel operational panels
- EasyLzin (Palembang, remote): designed and built the company website with profile, consultation, and a simple booking system, working directly with the founder
- Handled post-release maintenance and fixes, including deployment to Linux servers

Stryde - Fullstack E-Commerce Project | Team project | 2025

- Fullstack developer: interface design, ERD modeling, and system development; React + Inertia.js front end with a Laravel backend

E-Waste Management System - Capstone | University team project | 2025 - 2026

- Designed and built a web system for user registration, e-waste logging, and processing tracking; collaborated on a scalable architecture and ran functional and non-functional testing

EDUCATION

Bachelor of Informatics Engineering (S1 Teknik Informatika) | Universitas Pasundan, Bandung | 2022 - 2026 | GPA 3.66/4.00

Final-year project: MangMicro, an AI-based microlearning platform with a copyright registered at DJKI, Ministry of Law and Human Rights of the Republic of Indonesia.

SELECTED PROJECTS

NusaGate - Paid API Gateway Platform | Solo Developer | 2026 - Present | nusagate.rafiakem.tech

- Built the platform end to end: Next.js + TypeScript front end, Node.js REST API backend, and PostgreSQL with schema design, migrations, and transaction handling
- Integrated the Midtrans payment gateway end to end: webhook listener with signature validation, idempotency, amount verification, and atomic balance updates
- API key management, per-user usage quota and metering, model catalog, referrals, and balance adjustments
- Production figures as of September 2026 (verified directly against the production database): 76 registered users, 30 users actively sending requests, 34,000+ API requests, 4.3 billion tokens processed, 102 API keys issued, and 28 completed payments
- Runs on a Linux VPS with Docker, Nginx, and CI/CD (GitHub Actions), including monitoring, troubleshooting, and production bug fixes

MangMicro - AI-Powered Microlearning Platform | Solo Developer (Final-Year Project) | 2025 - 2026 | mangmicro.web.id

- Built a web application that turns lecture PDFs into interactive learning: lesson text, adaptive quizzes, slide decks, mind maps, audio, and narrated videos
- Designed the AI pipeline (Google Gemini) for content conversion, with user authentication, a progress dashboard, and media generation via Remotion
- Stack: Next.js 16, React 19, TypeScript, Tailwind CSS 4, Drizzle ORM, PostgreSQL (Neon), Vercel Blob
- Copyright registered with DJKI, Ministry of Law and Human Rights of the Republic of Indonesia, No. 001404869; praised by the examining lecturers at the final defense

MangRAG - RAG Chatbot SaaS Platform | Founder & Developer | 2025 - Present | mangrag.vercel.app

- Built the SaaS end to end: Next.js front end, API backend, document ingestion pipeline (chunking, embeddings, vector retrieval), citation-backed LLM answers, and an embeddable chatbot widget for external sites
- Runs in production with rate limiting, usage quotas, and user management; addresses common RAG failure modes such as answer hallucination

MangQuiz - Real-Time Multiplayer Trivia Game | Team Developer, IBM x Hacktiv8 Capstone | 2025

- Trivia game with a local party mode and real-time online multiplayer over WebSocket; Google Gemini integration to generate questions by category and difficulty
- React 18 + TypeScript front end (Vite, Zustand, Radix UI, Tailwind CSS) with an Express.js REST API backend

AWARDS

- **Registered computer program copyright** - Ministry of Law and Human Rights of the Republic of Indonesia (DKI) No. 001404869 for MangMicro, an AI microlearning program
- **Top 50 of 2,000 participants** - IBM x Hacktiv8 Capstone Project (MangQuiz Challenge, 2025)
- **GPA 3.66/4.00** - Bachelor of Informatics Engineering, Universitas Pasundan, graduated 2026
- **Four web products running in production** with real users, including one paid platform handling real payments

TRAINING & ORGANIZATIONS

- **ASEAN Digital Academy - AI Career Readiness** (2026): completed all 30 modules and earned the certificate
- **IBM x Hacktiv8 - Software Development & AI (SDI) Code Generation & Optimization** (June 2025): completed a series of technical sessions on AI-assisted development
- **Google Developer Student Club (GDSC) Universitas Pasundan** - Member (2023 - 2026): attended 10+ technical sessions, built technology projects with the team, and networked with 20+ industry practitioners

SKILLS

- **Languages:** JavaScript, TypeScript, PHP, SQL, HTML5, CSS3, C++ (academic projects), Python (basics, for scripting and automation)
- **Frontend:** React (18/19), Next.js (up to 16), Inertia.js, Tailwind CSS, Radix UI, Zustand, Vite, Framer Motion, Bootstrap, responsive web design, cross-browser compatibility
- **Backend:** Node.js (Express.js), Laravel (up to v12), Laravel Jobs & Scheduler, REST API design and third-party API integration, authentication and authorization, WebSocket (real-time), Next.js Route Handlers, background job queues with batching, webhooks (signature validation, idempotency)
- **Databases & ORM:** PostgreSQL, MySQL, SQLite, Drizzle ORM (schema design, migrations, transaction handling), vector retrieval for RAG; no production MongoDB yet
- **AI/LLM (application level):** Google Gemini API integration for content pipelines (text, quizzes, audio, video), RAG (embeddings, chunking, semantic retrieval, citations), prompt engineering, daily AI-assisted development with strict verification
- **DevOps & deployment:** Git, GitHub, GitLab, Docker, Nginx, Linux server administration, CI/CD (GitHub Actions, GitLab CI), OpenShift (OKD), Vercel, monitoring and alerting, pm2
- **Working practices:** Agile/Scrum, code review, debugging and troubleshooting (development through production), functional testing, technical documentation, requirements gathering directly with clients
- **Design:** Figma, Canva
- **Spoken languages:** Indonesian (native), English (professional working proficiency - read and write technical documentation daily; comfortable in work conversations)
